### Additional Information

Standard Euro Module Size. Overload Protection.

MM515 is internally fused, tested to withstand at least 8kV surges. It may therefore be connected directly to a standard ring main with the addition of a FCU.

It is normal for the front surface of the charger to become warm in use.

The MM515 module must be installed vertically.

Ensure that the mains supply is isolated before commencing installation and refer to the circuit diagram with the relevant product.

Bare earth cables must always be covered with appropriate sleeving and wired to the earth terminal.
