

Scolmore's Definity is 'Bella' for Cyprus Hotel

A refurbishment project at the Pia Bella Prestige Hotel and Casino in Northern Cyprus is now complete with all 54 of the guest bedrooms fitted out with products from Scolmore's Definity screwless wiring accessories range.

Definity products, in a matt black finish, were chosen for their smooth clean lines to provide a sleek and contemporary look in keeping with the overall style of the hotel's interior. All light switches and sockets in each room now feature Definity, with the 1-gang USB charger from the same range installed by each bedside.

The Definity wiring accessory range has evolved from Scolmore's well established Define flat plate accessory range and features all of the same attributes including modular switching but without the visible fixing screws. Definity goes one stage further by incorporating screwless, push-fit face plates in six assorted finishes. The face plates are supplied independently of the electrical inserts which means

that the initial installation of the product can be carried out and any subsequent maintenance or decoration completed before the final selection and fixing of the face plate. For the installer, this means a greater degree of flexibility.

The products were specified and supplied by Scolmore customer, Ozerk Company Ltd, based in Nicosia, Cyprus. Managing Director, Yusuf Ozturk, commented: "We have been working with Scolmore since 2014 when we were introduced at an exhibition and have developed a really good working relationship. The service they provide is excellent and the extensive range of products means there is always a great choice, no matter which type of project we are working on.

"The Definity range in matt black was absolutely perfect for the hotel, not just because it works so well with the interior décor, but the screwless finish makes it so much more flexible for installation purposes."
